BOOTH#113

Recro Pharma is a revenue-generating, specialty pharmaceutical company focused on products for hospitals and ambulatory care settings that is currently developing non-opioid products for the treatment of acute pain. Our lead product candidate is a proprietary injectable form of meloxicam. Intravenous, (IV), meloxicam has successfully completed multiple Phase II clinical trials for the treatment of moderate to severe pain. We believe injectable meloxicam compares favorably to competitive therapies in extent of pain relief, onset of pain relief and duration of pain relief.
