

FLORIDA SOCIETY OF ANESTHESIOLOGISTS

Physician-led. Patient-centered.

OCTOBER 2022 NEWSLETTER

MESSAGE FROM THE PRESIDENT

"No greater opportunity or obligation can fall the lot of a human being than to be a physician. In the care of the suffering a physician needs technical skill, scientific knowledge, and human understanding. Those who use these with courage, humility, and wisdom will provide a unique service for humanity and will build an enduring edifice of character within themselves. The physician should ask of

destiny no more than this and should be content with no less." Tinsley Harrison, M.D. (paraphrased)

When I started Medical School, I purchased Harrison's Textbook of Internal Medicine. As I began studying this formidable tome, I found this quotation by Doctor Harrison. It is a simple, yet elegant description of our profession.

We are Physicians. We have earned the right to be Physicians through many years of rigorous and demanding training. We serve in many roles and in many locations. We are specialists in anesthesiology, pediatrics, intensive care medicine, cardiac surgery, pain management, neurosurgery, and many others.

Members of the FSA have earned the right to be called Anesthesiologists. We don't "fake" expertise; we develop it through a lifetime of dedication. We practice in the military, academic centers, community hospitals, the VA system, and outpatient centers. Many of us volunteer in free clinics. When the COVID-19 pandemic struck our communities, we responded valiantly and unselfishly. I am inspired by the skills and dedication that members of our profession routinely exhibit.

Other healthcare providers are now unabashedly presenting themselves to the public as "doctors" and as "nurse anesthesiologists". They have obtained "Doctor of Education", "Doctor of Nursing" or other degrees and try to equate that with the education and training of Physicians. The FSA is working diligently to protect our profession and our patients by preventing this type of deception.

The Annual Meeting of the American Society of Anesthesiologists will be starting in a few days. I look forward to seeing everyone there!

Brence A. Sell, MD, FASA

MEMBER HIGHLIGHT

Dr. Rosemarie
Garcia Getting

Dr. Rosemarie Garcia Getting has been a valued member of the FSA since 2006, when she joined as a medical student. Over the years, she has served the FSA in many capacities, including as 3 West District Director, as Chair of the FSA Committee on Professional Diversity and most recently as a Delegate to the ASA House of Delegates. She founded the FSA Ambassador Program, which offers mentorship to new members and aims to promote diversity within FSA leadership. Dr. Garcia Getting's passion for diversity stems from her own experience overcoming the unique challenges faced by women physician leaders. She is inspired by her parents, who immigrated to the U.S. from Cuba and successfully pursued professional careers.

Dr. Garcia Getting, MD FASA earned her medical degree at Florida State University College of Medicine and completed her anesthesiology residency at the University of Flor-

ida in 2011. For over 10 years, she has served on the faculty at Moffitt Cancer Center in Tampa, where she specializes in onco-anesthesiology, the perioperative care of patients with cancer. Dr. Garcia Getting is the Associate Program Director for Moffitt's Onco-Anesthesiology Fellowship Program, one of only 3 programs of its kind in the country. She is an Associate Professor at the University of South Florida Morsani College of Medicine, where she is actively involved in teaching medical students and serves as Faculty Advisor for the Anesthesiology Interest Group. Prior to taking on the role of Associate Program Director, Dr. Garcia Getting served as Medical Director of Moffitt's ambulatory surgical center for 5 years.

Outside of her work, Dr. Garcia Getting enjoys the company of her husband and their 3 children. As Florida natives, they love the beach and sunshine.
